

BLUEGIGA SOLUTION MANAGER

Bluegiga Solution Manager (BSM) is a web-based remote management and monitoring platform for Bluegiga Access Servers. By using BSM, you can simultaneously upgrade, monitor and configure a large number of Bluegiga Access Servers, instead of configuring each device one-by-one.

Key Features

- Provides remote management of Bluegiga Access Server groups
- Easy-to-use graphical user interface
- Can be used over LAN, GPRS, or any other Internet connection type
- Communicates by using secure, encrypted network protocols
- Works seamlessly through firewalls
- Enables remote upgrades of Bluegiga Access Server software and content
- APIs available enabling total customization of look and feel
- User permissions can be tailored to provide different levels of user accounts, for example full administration permissions or statistics view only

Bluetooth Network Management

Bluegiga Solution Manager makes it possible to manage deployments of Bluegiga Access Servers from a single point by a heterogeneous group of administrators and users. BSM also enables content management for the Bluegiga ObexSender application.

BSM is designed for both companies looking for a ready-made management tool, and companies needing a customizable platform for tailoring the user interfaces and re-branding the system.

BSM is available as a hosted service or as a CD-ROM delivery for customers installing the system on their own server hardware.

Technical Details

- System components:
 - Management client software runs on Access Servers
 - Management server software runs on a Linux server hardware
 - Web browser user interface
- Light-weight management protocol supports command execution, configuration and file transfer tasks
- All management traffic is securely tunneled through a single TCP connection between the managed Access Server and the management server
- Management connection can be always open or only when scheduled (GPRS price optimization)
- Supports all Access Server WWW setup options
- Management actions can be scheduled
- Supports remote software upgrades
- Built-in support for application and system log replication to the management server

System Requirements

- Bluegiga Access Server software version 3.2 or newer
- RHEL4 binary compatible Linux server
- Any WWW browser
