

## FSP Newly Launch - Slim Adapter Series

**【2009/9/11】** FSP launches the brand new external power supply – Slim Adapter! As its name, Slim Adapter emphasizes on the features of “slim, thin and mini” to challenge the notebook adapter and the ultimate in consumer’s taste!

With the increasing consumers’ demands for thin and pretty 3C products, the 3C industry tends to design smaller and thinner products.

In addition to the improvement of the efficiency, many large

manufacturers focus on development of product miniaturization and sophistication. The minimized square measure of FSP’s brand new Slim Adapter series is only 9.5cm x 5.0cm in length/width. Its size is even smaller than a poker card and its thickness is just 1.65cm. Slim Adapter perfectly meets the market trend of slim, thin and mini. Once again, FSP creates a miracle in the power supply industry!

Slim Adapter series are the external power supplies with 100~240Vac input voltage and 19V single output. So far, the 40W, 65W and 90W adapters are available to meet with different requirements. Slim Adapter is complied with the Energy Star Level V, MEPS V, Eup 2.0, CoC 4.0 standards with the usage effectiveness rate of greater than 87%. Besides, it is equipped with many secure protection designs (OVP, OCP and SCP) and helps more power saving and safety efficiency.

With the characteristics of being creative, providing service with maneuverability, and being persistent in the pursuit of perfection, FSP’s RD team design the small but pretty external power supply – Slim Adapter. Due to its thinness, lightness, and convenience, it is absolutely the best choice for those who need to carry notebook for work, like to casually surf the internet at coffee shop or want to have the second power supply for back up!!
